Space Booking & Management

Do more with less space to facilitate your people's best work

A complete hybrid solution designed to help you get your teams back to the office and fully make the most out of your spaces

Challenges

## Coordinating your team's return

Employees are desperate to get back into the office to collaborate but companies simply don't know where to start.

Underused desks and rooms

Holding onto spaces employees may or may not use is too expensive and often leads to spaces being wasted.

No spaces to collaborate

Without the ability to book the right spaces, it's near impossible for your teams to achieve their best work when collaborating together on important projects.

Solution

Book the right spaces every time

Using the mobile app or web platform, employees can find where their teammates are sitting on the interactive floorplan, book a space nearby with the amenities they need and at any time they choose.

Efficient Space Management

Employers can orchestrate the best possible bookings layout for their spaces using neighbourhoods to designate space for certain teams as well as balance occupancy.

Understanding Usage

Know how your spaces are being used in real-time and in advance so you can plan ahead and improve employee satisfaction and experience.

Top Features

Desk & Room booking

Kadence mobile app
Employees can find, book, and reserve the right spaces on-the-go

The right space with the right people
Employees can find where their team are sitting on the floor plan, choose the amenities they need and book the right spaces nearby

Plug-and-play calendar integration
Book and reserve rooms directly from calendars and invite colleagues with just a few clicks

Office Neighborhoods

Add and remove available spaces
Make your office work for you by orchestrating the best possible space booking layout for your office

Assign teams on specific days
Create specific areas for specific teams and bring them in at any time you choose to collaborate

Social distance desk booking
Facilitate what spaces are available to use to keep people safe and space less crowded

## Space Usage & Analytics

Optimize occupancy usage
Understand how your spaces are being used so you can make the best decisions on how they should be used

Smart space management
Even out your bookings by making certain spaces unavailable to book during really busy periods

Predict booking behaviour
Get to know what spaces are more popular so you know in advance how they should be used

People & Visitor Management

Invite visitors on-site
Book a space for yourself as well as for a guest in seconds, and all within the same booking flow

Clear view user booking status
Automatically release spaces back into the bookings pool if a user forgot to check-in or if they checked-out early

Balance space occupancy
Cancel and book spaces for others so you can maintain a healthy balance of people in your spaces

Customer Testimonials

Great product for a flexible workforce

Kadence is a very intuitive app and has an easy workflow for booking spaces and knowing when co-workers are using the space.

CEO, Optimization Services

### Return to the office with confidence

Kadence is really easy to use and understand. It has enabled out team to return to the office with confidence and clarity,

Director of Finance & Operations, Create Charity

Modern solution for the new normal

The clean user interface and overall experience is great. Compared with others we looked at, we felt that this product was the best overall.

Senior Business Analyst, FM Conway

Capterra 4.7

About

Our vision is to create a world in which every person has access to the opportunity, the tools, and the environment to do their best work wherever they are. Now is the time for organisations to reimagine and reinvent the way they work and seize the opportunity to create a strong people-first culture where everyone can thrive.

We believe the way we work should lift us up, not lock us in – enabling people to flourish in everything they do. That's why we're building the next generation of tools for hybrid working, designed to unleash the potential of people, powering a more positive way of getting work done.

By building the operating system for the future of work, we improve the coordination of people, time, and space to help teams feel trusted and empowered to make the best choices about how, when, and where they get their best work done.
